

## The STAR Study: Starting a family when you have an Auto-immune Rheumatic disease

- Do you have an auto-immune disease that affects your muscles and joints?
- Are you a woman aged between 18 and 49 who:
  - is thinking about starting a family
  - is pregnant
  - has had a pregnancy in the last 5 years
  - has a child or children aged 5 or younger
- Do you currently live in the UK?

If so, please click here for further information about our online survey.
